Town of Fort Myers Beach to host Community Workshop on the Town's First Bicycle and Pedestrian Master Plan

Fort Myers Beach, Fla. — The Town of Fort Myers Beach, in partnership with the Lee County Metropolitan Planning Organization (MPO), is developing the Town's first Bicycle and Pedestrian Master Plan. It is an exciting project that promotes a healthy, vibrant, and safe community through cycling and walking. We want you to help the Town plan for bikeways, walkways, trails, and other related biking and walking projects.

Please join the Town, your friends, and neighbors at an interactive, community workshop on **Wednesday, February 15 at the Town Hall (2525 Estero Blvd, Ft. Myers Beach, FL) from 5:30 to 7:30 p.m.** We want you to share with Town staff: What does it mean to you to walk and bike in Fort Myers Beach? How can we improve bicycling and walking in Fort Myers Beach? What would encourage you to walk and bike more? And how can we better connect you to your destinations?

The workshop will include a presentation about the project, interactive exercises to collect ideas for plan recommendations, and time to talk with Town staff and project team members about your interests and ideas to improve walking and biking in Fort Myers Beach.

For more information about the project, please check the Town's website (fortmyersbeachfl.gov) for regular updates.
